Per our meeting on Monday (July 6), transmitted is a map showing the proposed location of the
new groundwater monitoring well MW-15. As requested, the well is located in a downgradient location
of monitoring well PZ-3. Please contact Treva Houser at (215)269-2249 or me at (724)934-2610 to
approve the proposed location or to discuss an alternate location for the well. The proposed well will be
installed according to procedures used in the installation of the two recently installed wells (MW-13 and
MW-14) and the wells installed as part of remedial action construction. Thank you.
